

APPENDIX D

AMENDMENT TO SPECIFICATION **(MARKED UP VERSION)**

On page 4, please delete the paragraph spanning lines 1-6, and replace with the following paragraph:

Figure 3: Graphic representation of the average expression of GUS enzyme in primary transformants of (A) tomato, (B) oilseed rape and (C) potato. GUS expression was determined visually and compared to a high level expressing 35S GUS transgenic tobacco plant ranking a score of 4. Standard deviation of the measured values are indicated on each of the bars.
